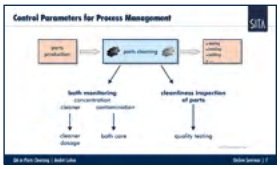
16 - 25 April 2024

Application Training
„Measurement Technology for Quality Assurance of Industrial Cleaning Processes"

Qualify in monitoring and controlling your cleaning process. Within three different modules we provide basics and demonstrate the beneficial use of our SITA mobile measuring devices for process management and control.

Module 1 - Setting up Quality Assurance in Parts Cleaning Processes

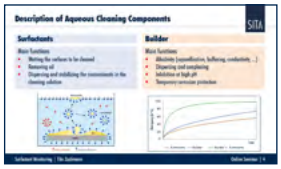
Review of industrial cleaning processes and how a process control can be used for a stable parts cleanliness.
(30 min)



18 April 2024 09:00 CET / UTC+1 Date for participants in Europe and Asia > Registration
18 April 2024 16:00 CET / UTC+1 Date for participants in Europe and America > Registration

Module 2 - Monitoring the Cleaning Bath

Basic information about cleaning chemistry, bath contamination and measuring methods for suitable cleaner dosage and bath maintenance.
Demonstration SITA DynoTester+ and SITA ConSpector
(60 min)



23 April 2024 09:00 CET / UTC+1 Date for participants in Europe and Asia > Registration
23 April 2024 16:00 CET / UTC+1 Date for participants in Europe and America > Registration

Module 3 - Inspecting Cleanliness

Overview of measuring and testing methods as well as information about setting limit values with application examples.
Demonstration SITA CleanoSpector and SITA SurfaSpector
(60 min)

25 April 2024 09:00 CET / UTC+1 Date for participants in Europe and Asia > Registration
25 April 2024 16:00 CET / UTC+1 Date for participants in Europe and America > Registration

All modules are composed of a lecture part and Q&A chat.
After the seminar, attendees will get the seminar documents and a certificate of participation.

Speakers

André Lohse
Head of applications

Stefan Büttner
Application specialist parts inspection

Tilo Zachmann
Application specialist tensiometry
